

E79 paired pilot: 32 B, GFSK200, +13 dBm, 3.3 V

Grey: raw sample range (detail: samples); blue: 0.2 ms means; red: pretrigger median; green: saved window

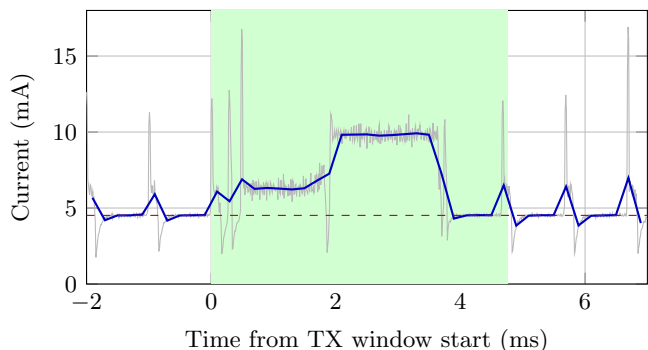

TX repetition 1: trigger vicinity

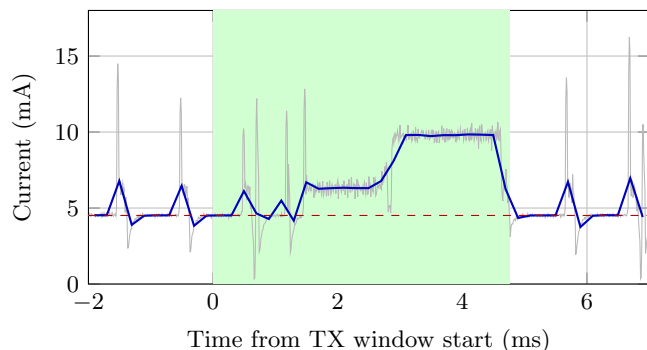

TX repetition 3: trigger vicinity

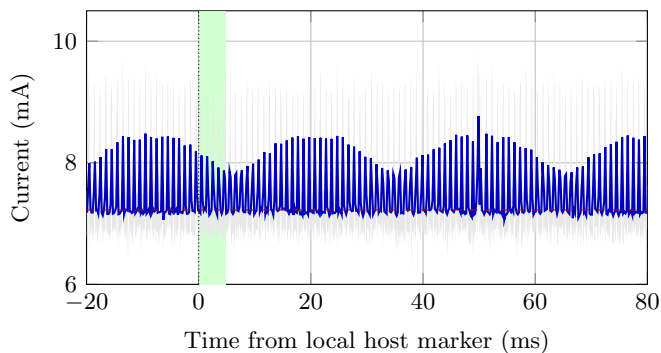

TX repetition 1: window detail

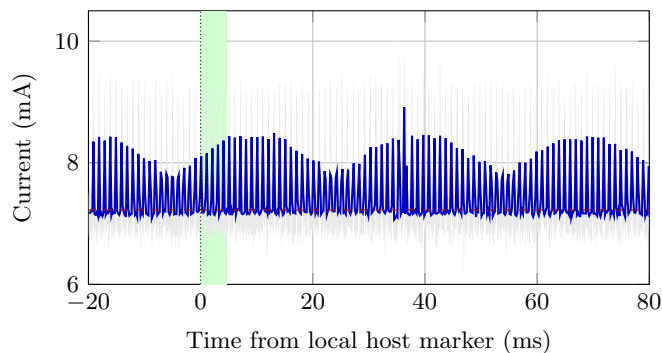

TX repetition 3: window detail

RX repetition 1: trigger vicinity

RX repetition 3: trigger vicinity

Each endpoint uses its own host marker and independent PPK clock. Panels are not hardware synchronized.

RX green window is the legacy 0–4.76 ms listening metric, not a localized received-frame interval.
